

Our foundation serves a group of adults who have an ultra-rare, inherited, metabolic disorder. We have already had 5 excellent speakers who addressed the particular needs of these patients. Each presenter provided our community with a 60-minute lesson that included a Q&A opportunity. The SSIEM funds were used to pay for the Zoom master who did what we could not do for ourselves: manage all technical aspects of the live webinars, edit a video recording for future viewers' benefit, and augment the English audio with closed caption translations in German, French, Brazilian Portuguese and Hebrew. In the slide that opened each presentation, we expressed our appreciation to the SSIEM for making the event possible.

With best regards,
