

MITOACTION

Report for Society for the Study of
Inborn Errors of the Metabolism
July 2020

EVENT

International Metabolic
Conference

GOAL

To educate families on disease
management, current clinical
trials, nutrition and the social
needs of caring for a child or
adult with an FAOD.

GRANT

€2,500

ATTENDEE FEEDBACK

The conference exceeded my
expectations. There were so
many leaders in the field
sharing in such a kind and
professional manner their
expertise and love for this
patient community, The break
out discussions were important
for processing the event as a
whole in a personal way.

MITOACTION & FAOD'S

Fatty acid oxidation disorders are rare
metabolic disorders that prevent the body
from generating cellular energy from fats
during times of stress, illness or fasting.
MitoAction is committed to making a
measurable impact in the lives of those
affected by FAOD's.

ABOUT THE EVENT

The 2nd annual International Metabolic
Conference was held virtually on July 23-
25, 2022. 451 individuals including
patients, parents, siblings, caregivers,
family members and professionals attended
the event and 20 different countries were
represented.

SPEAKERS & TOPICS

Over 25 speakers with expertise in the field
of fatty acid oxidation disorders presented
on various topics including: clinical trials,
disease management, nutrition and the
social needs of caring for a child or adult
with a rare metabolic disorder.

Thank you to the Society for the Study of Inborn Errors of the Metabolism for supporting this event!
